

2020 Cyber Webinar Series

Layered Cybersecurity: Finding the Best Strategy for Your Bank

Cybersecurity Assessment Tool 2.0 & GLBA Privacy

GLBA Security Expectations, Internal Controls & the Human Factor

Building & Sustaining a Cyber Intelligence Unit (CIU)

Introduction

WHY PARTICIPATE?

Financial institutions rely heavily on IT professionals to keep their myriad internal systems up-to-date and implement new technologies for employees and accountholders. Regardless of how technology is structured and deployed, financial institutions remain a prime target for data breaches, cyber-attacks, fraud and scams from unseen criminals. Regulators continue to focus on cybersecurity in the wake of numerous, highly publicized data breaches. Now, more than ever, it is crucial that IT professionals obtain current, relevant and ongoing training to protect data integrity and functionality. Ensure your IT strategy strikes the right balance with this series. You may register for the entire series or individual sessions.

THREE REGISTRATION OPTIONS

1. LIVE WEBINAR

The live webinar allows you to have up to three audio and Internet connections to view online visuals as the presentation is delivered. You may have as many people as you like listen from your office speaker phone. Registrants receive a toll-free number and pass code

that allow entrance to the seminar. The session is approximately 90 minutes, including question and answer sessions. Seminar materials, including instructions, PIN number and handouts are emailed to you prior to the broadcast. You need the most-current version of Adobe Reader available free at www.adobe.com.

2. ON-DEMAND WEB LINK

Can't attend the live webinar? The on-demand web link is a recording of the live event including audio, visuals and handouts. You even receive the presenter's e-mail address so you may ask follow-up questions. Within five business days following the webinar, you are provided with a web link that can be viewed anytime for the next six months. This link expires six months after the live program date.

3. BOTH LIVE WEBINAR AND ON-DEMAND WEB LINK

Includes options 1 and 2 above.

Listen on your iPad, iPhone, or Android (Instructions will be emailed to you with the on-demand link).

LAYERED CYBERSECURITY: FINDING THE BEST STRATEGY FOR YOUR BANK

Thursday, August 13, 2020
Aaron Daniels, Infogressive, Inc.

It's no secret that the financial industry is a prime target for cyberattacks. You control vital information that the bad guys want and are willing to expend the necessary time and resources to get. To defend against such attacks, your cybersecurity strategy needs to include a

layered approach for prevention and detection. This webinar explains who your adversaries are and what security services you should have in place to secure your organization. Don't be an easy target.

CYBERSECURITY ASSESSMENT TOOL 2.0 & GLBA PRIVACY

Wednesday, September 9, 2020
Randall J. Romes, CliftonLarsonAllen LLP

This webinar is an introduction to the FFIEC's Cybersecurity Assessment Tool (CAT) and delves into its history and the evolution, including the change from a binary approach (i.e., control exists or does not exist) to the

current assessment of cybersecurity readiness measurement. This introductory webinar provides an overview of GLBA compliance and application of the CAT tool/process for measuring, tracking and reporting compliance.

GLBA SECURITY EXPECTATIONS, INTERNAL CONTROLS & THE HUMAN FACTOR

Wednesday, October 14, 2020
Randall J. Romes, CliftonLarsonAllen LLP

Take a deep dive into GLBA expectations and learn how to apply the FFIEC's Cybersecurity Assessment Tool (CAT) and process to address those expectations. You learn best practice internal controls that are tied back to GLBA expectations for running a safe and sound cybersecurity operation. Case studies highlighting the "human factor" in the security chain are emphasized to demon-

strate where risky exceptions can arise. This webinar also addresses the threats of targeted attacks and phishing/vishing. Examples of publicized breaches and spear-phishing are examined, such as the compromise of John Podesta's email from "Gmail" advising he must change his password for security reasons.

BUILDING & SUSTAINING A CYBER INTELLIGENCE UNIT (CIU)

Wednesday, October 28, 2020
Randall J. Romes, CliftonLarsonAllen LLP

This advanced webinar explores the strategy and structure of mature cybersecurity operations within financial institutions. It leverages the concept of a Financial Intelligence Unit (FIU) from the BSA/fraud spaces as the beginnings of an example for a Cyber Intelligence Unit (CIU). Take this opportunity to explore examples of mature cybersecurity operations; how these operations

leverage internal and external resources for threat intelligence, such as FS-ISAC and InfraGard; how to effectively collaborate and share threat intelligence; and how to perform Red Team/Blue Team/Purple Team activities and "threat hunting" exercises to further improve your cybersecurity profile and operations.
