"CURRENT TRENDS IN INTERNATIONAL CYBERCRIME: THE UNDERGROUND CHECK FRAUD ECOSYSTEM"

Playing defense against sophisticated cybercriminals and fraudsters is usually too little and too late. To win, financial institutions must deploy proactive threat intelligence that detects imminent threats with greater speed, accuracy and effectiveness. Learn how to leverage the Deep and Dark Web forums and known malware infrastructure to collect highly targeted and actionable and threat intelligence.

During this presentation, you learn what is the "Digital Criminal Underground" aka the "Dark Web"; who are these threat actors from the "Underground" that are targeting financial institutions (including community banks and credit unions) nationwide; how can you recover & collect targeted & actionable intelligence from the "Criminal Underground"; and how do leading financial institutions leverage such intelligence to combat and prevent cybercrime, account takeovers and overall financial fraud, including check fraud?

Eli Dominitz serves as chief executive officer of Q6 Cyber. Q6 offers a unique intelligence enabled solution that transforms the way organizations defend against cyber threats. The Q6 Cyber team consists of cybersecurity experts with extensive backgrounds in Israeli and U.S. intelligence organizations. Prior to Q6 Cyber, Dominitz co-founded another cybersecurity company focused on third-party (vendor) risk management.
